

Julian —

No idea if my letter landed or ended up under a stack of tyre invoices. Either way, the site I built for JD Tyres is still there — and it still costs nothing to have a look.

Two minutes on your phone whenever you get a quiet one: point the camera at the code and it opens straight up. A link to your site's at the top.

If it's not for you, no worries at all. Keep up the brilliant work either way.
